position of gameObjects

camera

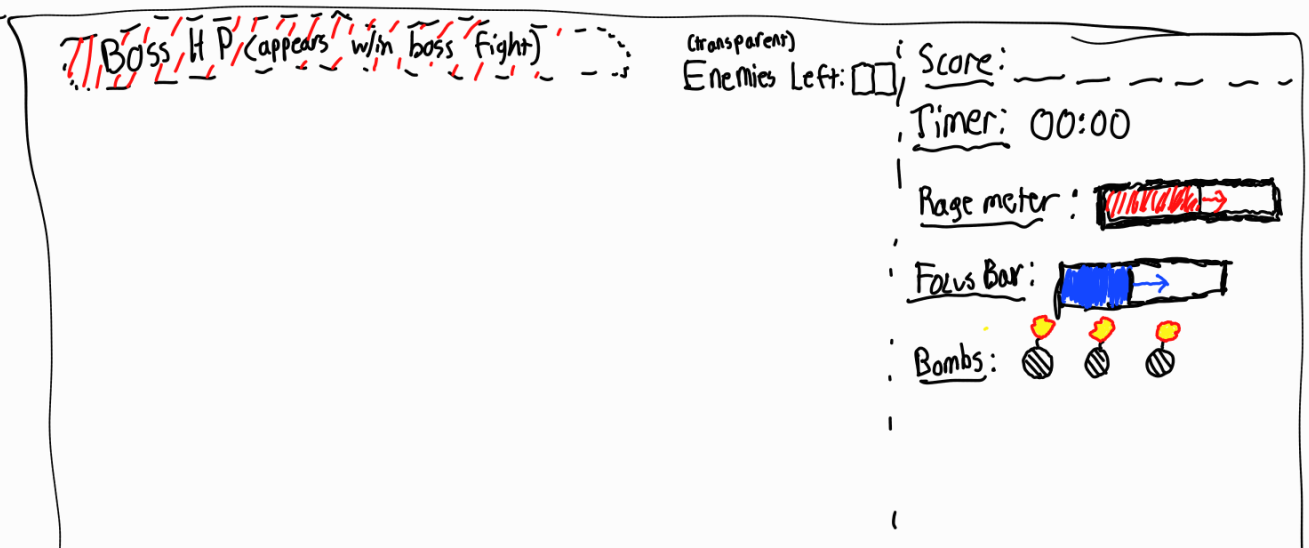

- camera moving upwards
- enemies not moving w/ camera
- player, without input, moves upwards

Just like camera controller project

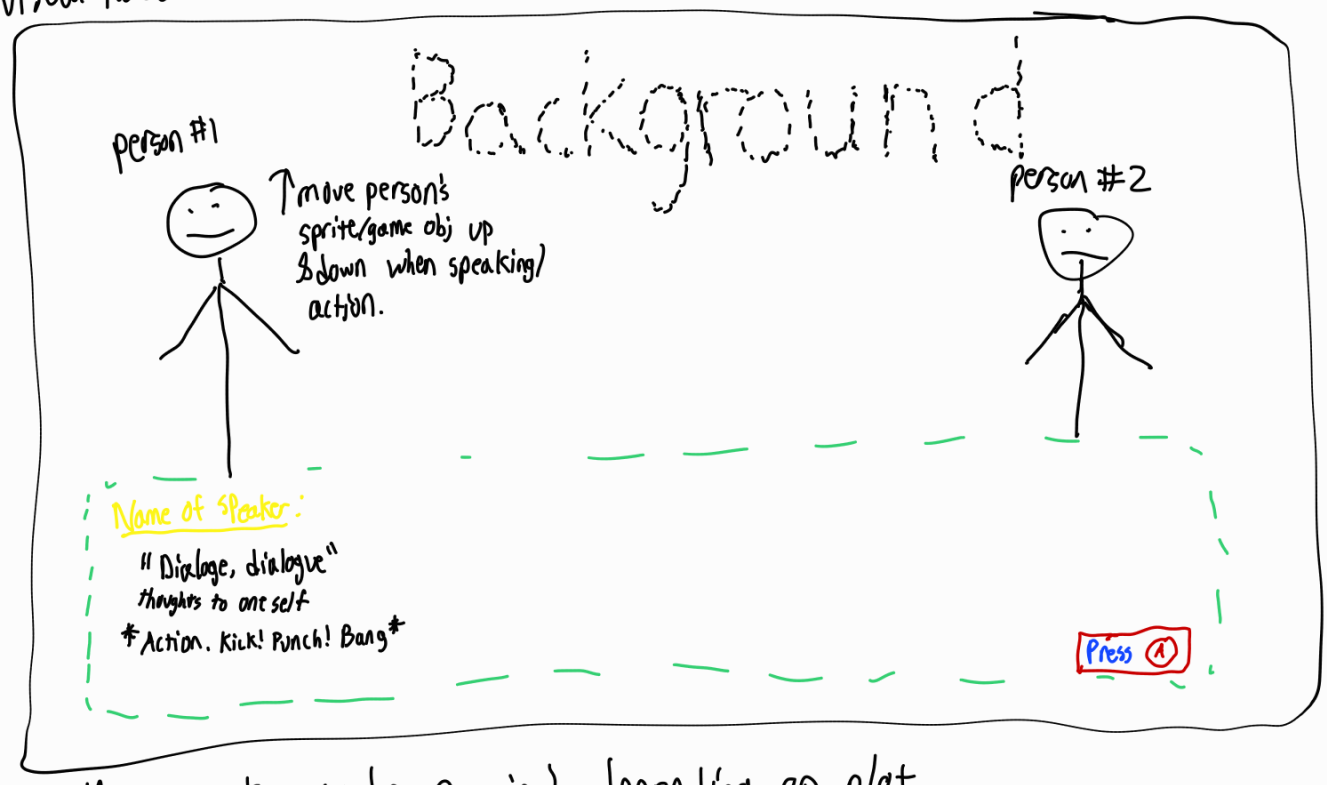

• note*: enemies can leave camera. Player can't.

UI

Dialogue/Plot representation (the visual novel section of the game)

notes: More work may be required depending on plot. This may include music change, cutting to black, greyscaling for flashbacks, characters shifting expressions, and or sound effects.

Audio requirements (music/SFX)

Note: will require more as project continues

Music

- Music for boss fights
- Base level music
- Music for dialogue
- Menu music
- Plot twist, scary music

TO Be Continued ...

SFX

- rats squeaking sFX
- Player hit sFX
- Player fire SFX
- .SFX for next dialogue
- .SFX for selecting button in menu
- .SFX for boss moves
- .SFX for focus mode
- SFX for heart meter
- .SFX for locker door slamming shut
- .SFX for slow footsteps
- .SFX for car breaking
- .SFX for car door shutting

- SFX for loud footsteps
- SFX for bomb activation
- SFX for death
- SFX for victory
- SFX for death screen

TO be continued ...

Player abilities

Play fire SFX

Fire 

- fires at certain speed
- Damage
- Despawn when reaching edge of screen

HP 

decrease by 1/4 heart on Easy
1/2 for Intermediate
3/4 for Advanced
1 for master
3 for hell difficulty

for any and all projectiles contacting player

- Play hit SFX

Focus: Slows everything

- Focus bar decreases while active
- Focus only triggers when full && by player input (hold button for as long as they want)
  - > slowly recharges over time
  - > fills by 25% if player is hit
  - > focus bar shown in UI
- Play focus slowdown SFX
- Focus amnt, recharge, & other metrics to be adjusted by Game tester

Rage

- Play rage SFX

Similar to focus bar, but also not

- when full, player fires projectile. Resets to 0.
- triggered by player input
- fills over time
- decrease by 25% if not full && player is hit
- amount shown in UI

Bomb

- do not recharge

- only 3 (up to game tester) per level
- shown in UI
- destroys all enemy projectile in certain radius from player
- triggerable by player
- play bomb SFX

Roll

- Player has invincibility frames
- Projectiles travel through player
- no damage taken
- Player has a burst of speed, but slower for a few moments afterwards (prevents spam).
- no limit
- make sure player can't spam dodge

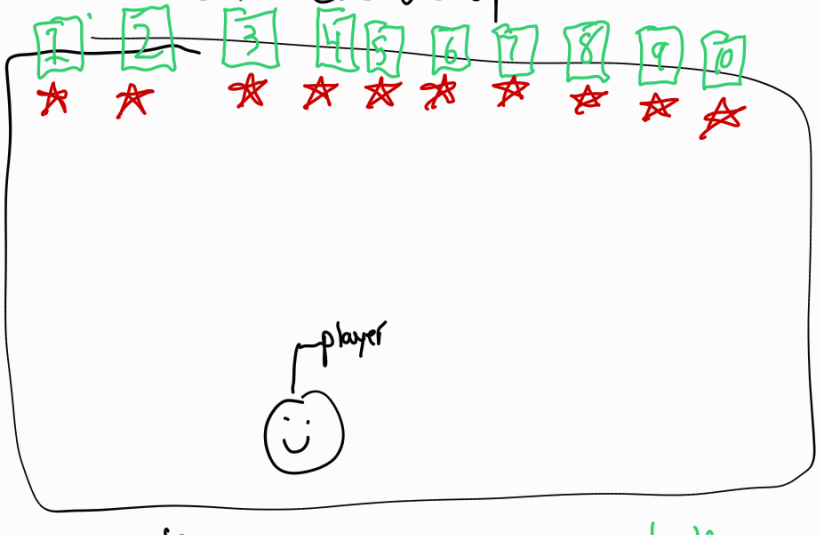

Tricky parts of gameplay:

- Despawning projectiles & enemies when they hit the edge of the screen
- What if player presses fire/dodge/bomb in a cutscene?
  > Random explosion sounds?
- Have accessable & easily changable parameters
  > for example what if I want to change a projectile's speed?
  > what if I want to add another bomb
- have SFX for when a character speaks
- We all suck at art how tf we gonna do animations???
- stopping the camera movement during a boss fight
- game Over screen
- pause menu
- volume control

- Order of operation
- transition from dialogue scene to gameplay scene
- enemy types
  > different projectile patterns.
- limits to where enemies can shoot
- adding UI elements depending on which level we're on
- Unique mission depending on moral alignment.
- Pause menu
- Credits Scene
- level select
- best time/score
- Collectables
- Phases of development
- where & when to spawn enemies

Phases of development

1)

- moving camera w/ player moving @ camera speed. Cannot escape bounds of game.

- spawn enemies at top. at spots 1-10
- enemies fire projectiles such that they can accurately hit the player if Player doesn't move himself out of the way

- enemies fire every 5 seconds
- player health shown
- player gets damage If hits a projectile or enemy
  > play damage SFX
  > update heath
  > have player blink in and out, invincible for a second after damage
- Despawn projectiles & enemies when they move out of frame
- Play music
- Pause/stop game if heath reaches 0
  > play death SFX
  > replace music w/ game over music
- show timer at right side
  > timer stops when player dies

base

- projectiles
- spawn/despawn
- enemies
- player
- movement/abilities
- VN scenes
- boss healthbar

better

- music
- SFX
- map & level select
-

Optional

- voice
- expressions
- pause
-
